CUSD Secondary Math Placement Protocol

1. Thirty (30) math credits are required to earn a high school diploma and graduate from CUSD. All grade 9 and higher math courses taken during grades 9-12 fulfill high school graduation requirements. Integrated Math 1 is a California state graduation requirement to earn a CA high school diploma. All students must pass IM 1 or higher.
2. All new CUSD students entering grades 9-12 are required to take a math placement test prior to enrolling in a math course. Test dates will be scheduled in June and August.
3. All new students in grades 6-12 will be reassessed within the first 30 calendar days of enrollment to verify accurate placement. (CA SB 359)
4. Students entering grades 6-12 are required to take the math placement test prior to enrolling in an honors math course.
5. CUSD will not accept any concurrent math courses from external institutions for the purposes of accelerating middle school math placement.
6. Students submitting transcripts from online courses are required to take the math placement test for the requested course. Transcripts from **online** courses must reflect a grade of A or B for semester 1 and 2.
7. The math readiness assessment will be administered to all students in Math 8, Integrated Math 1, 2, 3, and precalculus at CMS and CHS in May/June.
8. A course waiver will be required for any 9-12 student requesting to enroll in an honors course when the math placement test, teacher recommendation, and/or grades indicate a different course is the most appropriate placement.
